

Trelleborg industrial anti-vibration solutions

Performance that's never felt better

Making business feel better

We know that you're looking for more than products – you're looking for business solutions. That's why we focus our product development on enhancing and differentiating your operations, and making your business more profitable. Whether it's improving health and safety, increasing reliability, reducing downtime or optimising maintenance – we have solutions that will help you achieve your objectives.

Wherever there is machinery there is vibration, and wherever there is vibration you need to protect your people and your productivity. Trelleborg Industrial AVS creates shock, noise and suspension solutions that are tailored to your unique requirements. Across all applications, our specialist teams will assist you with specification and design. With an end-to-end service we take your project from concept, through manufacturing, to testing and installation with expert polymer engineering. This helps to mitigate risk, facilitate easy administration and allows you to effectively manage cost over the long term. We also deliver training on getting the best out of our anti-vibration solutions for customers and distributors.

NEVER FELT BETTER

Trelleborg Industrial AVS make improvements people can physically feel. From smoother travel to quieter, more efficient machines, we make life feel better. Our processes, products and people steady the world around you, and with quality, testing and compliance built in, you have the confidence you're dealing with a true partner that understands your challenges and presents solutions that feel better over an extended and often arduous lifecycle.

Being at sea
never felt better

MARINE AND ENERGY

In the marine and energy sectors, downtime is at an absolute premium, so you need solutions and services that just work. Our bespoke anti-vibration and noise suspension solutions for marine applications and energy production are guaranteed to meet specification, regulations and certification requirements, with on time and on budget delivery, to help you navigate complicated logistics and avoid unnecessary downtime.

Harsh and variable conditions demand high quality, low maintenance products and stringent testing. Our solutions encompass these factors and more, enabling you to keep costs low over the whole product and project lifecycle.

Industry never felt better

INDUSTRIAL

We provide performance you can rely on to fit and forget.

Our anti-vibration solutions give you a firm foundation to build sustainable productivity plans upon, across all manufacturing and processing equipment installations. Our strong supply chain means we can reduce costs and deliver on time and on budget.

Our intelligent innovation is focused on the outcomes you want to achieve: providing a safe environment for machine operators, reducing noise pollution, reducing downtime to save costs and increase revenue. We partner with you to provide so much more than products.

Being on track
never felt better

RAIL AND MASS TRANSIT

Our materials and technologies are developed to facilitate faster, smoother, quieter and safer rail travel. With safety and reliability so high on the agenda, your market is a rightly conservative one. That's why our solutions come with the reassurance of extensive and reliable testing, and finite element analysis carried out in our IRIS approved factory.

The industry is globalizing rapidly, but political and economic factors still demand localization. With over 100 years' experience supplying anti-vibration solutions to the global rail industry, we have a deep knowledge of national and international regulations and can help you to ensure compliance through high quality, total reliability solutions.

A day's heavy lifting never felt better

OFF-HIGHWAY VEHICLES

Engines are becoming lower weight, cabs have stricter noise, vibration and harshness levels to adhere to, maintenance access is becoming more difficult, loads are increasing and trucks are becoming heavier: vehicle suspension needs to evolve too.

The demands on off-highway vehicles are more diverse and challenging than ever. That's why our solutions are built to improve safety and comfort, prolong life and optimize performance, allowing you to maximize productivity, reduce downtime and meet environmental objectives.

MAKING THE WORLD FEEL BETTER

Trelleborg Industrial AVS is part of Trelleborg Group, which employs 15,000 people in over 40 countries. Whatever your challenge, whatever your role and wherever you are, we are nearby to offer expert knowledge and quality solutions. Work with Trelleborg Industrial AVS and enjoy improvements you can feel.

Using advanced polymer technology, Trelleborg's industrial anti-vibration solutions (IAVS) operation specializes in the field of rubber-to-metal bonding for the removal of unwanted noise and vibration. Solutions include mountings, bearings and suspension. As part of the Trelleborg Industrial Solutions business area of Trelleborg Group, Trelleborg's IAVS operation utilizes over 100 years of experience to provide solutions for numerous applications and environments, with a reputation of high quality, performance and service life. Markets include rail, marine, industrial and off-highway. The company focuses on isolation, attenuation and suspension solutions of unrivalled quality and reliability. The company's commitment and expert polymer technologies create maximum business value through improved longevity, productivity and cost effectiveness, while also optimizing comfort, health and safety.
