

TRELLEBORG ENGINEERED COATED FABRICS

Why choose UV Printing?

Revolutionize the print process with Trelleborg Engineered Coated Fabrics

- Innovative, no-odour ink that does not crack when stretched
- Withstands harsh chemical cleaning*
- No impact on FR performance
- Biocompatibility tested – cytotoxicity results available on request
- Unlimited colour options – 5 colour print process

Eliminate the need for screen printing

- Abrasion resistant ink
- Washable
- More breathable than screen printing
- No impact on breathability and MVTR when printed on Dartex® ENDURANCE coating

Make significant cost savings as the fabric roll manufacture and printing take place at same location

*White ink lifetime when exposed to continuous bleaching comparable to lifetime of non-printed Dartex® Endurance coating
