

Part of the Trelleborg Offshore & Construction business area of Trelleborg Group, Trelleborg Engineered Products is a leading global developer, manufacturer and provider of engineered polymer solutions to the energy, infrastructure and mining industries. Performing in some of the harshest environments on earth, its principal products are sealing systems for tunnels, a wide range of bearings, polymer solutions for floatover technology and wear resistant products for the mining industry. With local support, a track record of over 100 years and its everyday ingenuity, customers can rely on Trelleborg Engineered Products to deliver innovative polymer solutions that significantly improve the quality, safety and efficiency of its customers' operations worldwide.

Everyday ingenuity in polymer solutions

FOR INFRASTRUCTURE, ENERGY AND MINING

Everyday ingenuity over 100 years

Over the past 100 years, Trelleborg Engineered Products has been applying everyday ingenuity to everything we do. A century of expertise in polymer solutions, fuels our determination to deliver cost-effective products that seal, damp and protect in the harshest environments.

With performance enhancing products tested to the highest level, a vastly talented workforce and an unmatched track record, you can be sure that the exact specifications of your project will be met.

Here you will discover some of the industries where Trelleborg Engineered Products are applied.

From structural bearing systems to float over solutions, grout seals for offshore wind farms, corrosion protection to anti-vibration mounts, Trelleborg Engineered Products are pivotal in a number of applications for different types of energy production, including:

- **Oil & Gas**
- **Renewable energy**
- **Power plants**
- **Oil sands**

When it comes to energy production you must be able to adapt to change. Our investment in technology means we can fulfil our dedication to supplying the energy sector with the industry-leading structural security it requires. This allows the energy industry to continue to explore ever-more harsh and challenging environments for new ways to fuel the environment we live and work in.

Everyday ingenuity is our foundation

A strong infrastructure is the foundation of a successful society.

Trelleborg Engineered Products provides structural security to numerous civil engineering applications in construction and transport.

Some examples of these include:

- Dredging hoses
- Seals for immersed tube and bored tunnels
- Seals for storm surge barriers and lock systems
- Bridge expansion joints
- Damping systems to isolate vibrations and noise

Trelleborg Engineered Products can be found all around you, on roads and railways, bridges and tunnels and in buildings and power plants. Our unsurpassed experience in polymer solutions helps to support strong infrastructure, driving the success of societies across the globe.

Extracting everyday ingenuity

Miners delve deep into some of the harshest environments on Earth to extract precious resources vital to our daily lives.

Trelleborg Engineered Products provides a wide range of specialized wear and impact resistant polymer solutions, helping the industry cope with these severe conditions.

Products include:

- Reinforced rubber sheeting for abrasion purposes
- Impact resistant panels for lining trucks, wagons, chutes and launders
- Grinding mill liners
- Corrosion and wear resistant linings for tanks, pipes and containers

Meticulously designed, with over 100 years experience built-in, our products help to maximize production, reduce maintenance costs, improve working conditions and reduce downtime.

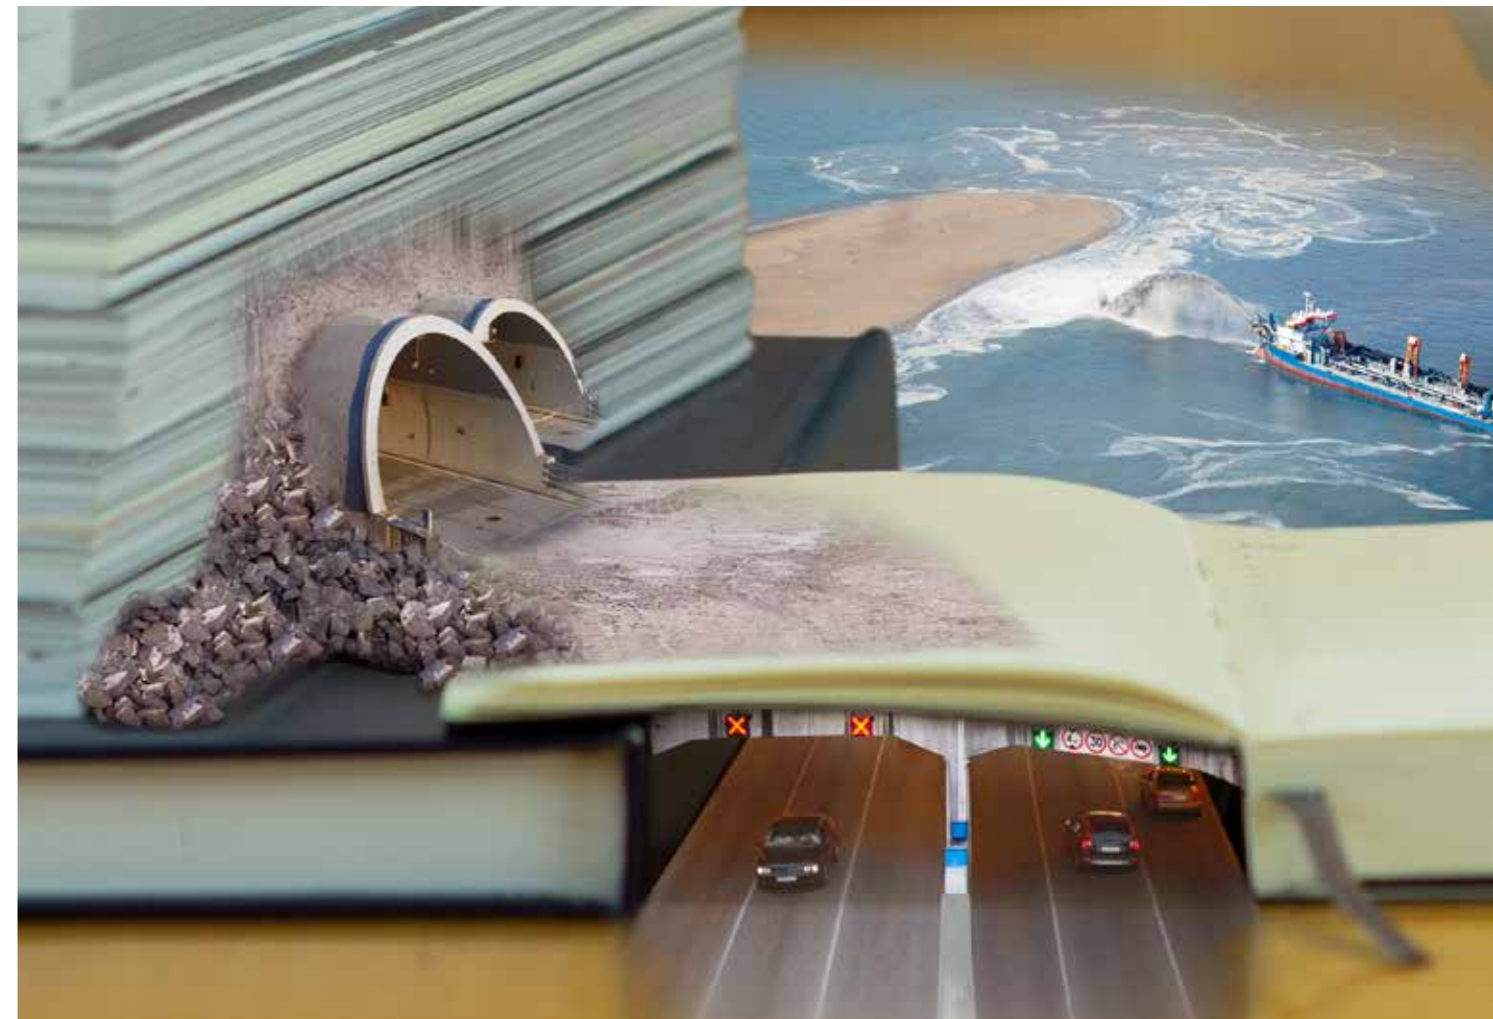

Everyday ingenuity across the globe

Trelleborg Engineered Products is part of Trelleborg's worldwide group which spans every continent. With more than 15,000 employees in over 40 countries, Trelleborg has a truly global reach.

Trelleborg Engineered Products

HERE TO HELP YOU, WHATEVER YOUR ROLE

Whether you're an operator, contractor or consultant, Trelleborg Engineered Products will benefit you. Our products incorporate a flawless track record and meticulous design with long-term value, sustainability and performance. But our industry-leading knowledge of polymer solutions, coupled with over 100 years of experience, gives you something even more valuable: peace of mind.
