

Trelleborg is a world leader in engineered polymer solutions for agri, food and beverage.

We care for milk-lovers around the world

With more than 100 years in the polymer industry it is safe to say that we know, live and love the material. We provide a wide range of advanced and customized solutions that seal, damp and protect critical applications. Our broad Trelleborg network ensures that you will find us close by, no matter where you are.

Our mission: Provide good solutions for you and the cow. We supply milk tubes and milk liners to most of the leading producers of milking equipment around the world. All our products are specially designed, manufactured, branded and distributed according to the specifications provided by each OEM customer.

New ways of thinking

We like to support you with our diverse application expertise and decades of innovation experience to challenge known solutions. We love providing you with solutions beyond products.

We:

- Have in-house development, adaptation and production of rubber compounds to fulfill customer and application demands
- Work with food approved materials (like BfR, FDA and 3A)
- Work with many different polymers (NR, SBR, NBR, solid or sponge EPDM, silicone, TPE...)
- Can combine up to three different materials into same product

Product examples:

- Milk liners
- Milk hoses
- Air and pulsation hose
- Double pulsation hose
- Combined milk and pulsation hoses
- Gaskets
- Reinforced hoses
- Flooring profiles and fenders
- Edge protectors and dampers
