Expert polymer technology for leak-free pipe networks

Trelleborg Pipe Seals offers the most extensive range of premium pipe, manhole and connector sealing systems on the market and a truly outstanding pipe rehabilitation service.

Combining a local service with global expertise, we can develop and supply leak-free solutions that are to your complete satisfaction. Our experience spans over 60 years and in that time we have continually delivered innovative polymer solutions that help you achieve optimal pipe, manhole and connector performance. Whether you need an entirely new pipe sealing systems or are looking to maintain an existing one, Trelleborg Pipe Seals will see you through from beginning to end.

What can Trelleborg Pipe Seals offer you?

Trelleborg Pipe Seals are one of the world's leading suppliers of sealing systems for concrete and plastic applications.

It has expertise in two key areas:

Pipe, manhole and connector seals for new applications

Pipe rehabilitation

In both areas, Trelleborg Pipe Seals applies its experience and innovation to help you overcome your challenges in water, sewerage and drainage.

Applying the most advanced polymer technology and engineering expertise, we have created an extensive range of new pipe, manhole and connector seals and rehabilitation solutions. These solutions are amongst the best on the market, offering:

Our solutions are ones you can trust, helping you build a strong reputation in your field, with the complete assurance of leak free pipe, manhole and connector seals.

Our world-class no dig pipe rehabilitation solution is second to none, offering effective maintenance of existing systems. Our revolutionary approach prioritises safety, ease of installation and ensures minimal disruption to your wider operations. We help you manage existing pipe framework, so you can identify damage and carry out rapid repairs, ensuring a leak-free network and peace of mind.

World leading pipe seals

Our broad range of Forsheda pipe, manhole and connector seals can be applied to concrete and plastic pipes and manholes for water, sewage and drainage applications. Offering the very best in ease of installation and quality, our seals ensure productivity and performance, allowing you to focus on your business with complete peace of mind.

Our seals ensure your pipe network is efficient, smooth and leak-free, providing a dedicated service from beginning to end.

Manufacturers of plastic piping can benefit from improved productivity and reduced scrap / waste, and market-leading technology to ensure their products come with the added value of a robust, locked-in seal.

In combination with our seal engineering expertise, you can build a stronger reputation as a supplier of quality, high-performing products.

Concrete pipe and manhole manufacturers benefit from a range of bespoke sealing systems, depending on their specification. Whether you want to have your seals fitted to your pipes during the manufacturing process, or fitted during installation, there is a range of options available to you.

World class rehabilitation service

Our pipe rehabilitation solutions allow users to maintain existing networks for extended periods of up to fifty-seventy years, helping you lower the overall lifetime cost of your piping.

The epros® DrainSystems product range covers the entire scope of trenchless or "no-dig" repair and renovation measures in a pipe system, from spot repairs to lining solutions. Our engineers apply their expertise and knowledge of pipe technology to create easy to install solutions that fit your existing network exactly, offering a truly bespoke service.

Offering full support throughout the lifetime of your project, we offer training in pipe maintenance and upkeep, ensuring optimal longevity of your solution. This allows you to focus on building your reputation in your business area, without having to worry about the efficiency of your pipe network.

Our solutions provide you with complete peace of mind, ensuring your pipe rehabilitation service runs smoothly from end to end, leaving your network leak-free.
