

DIAMOND TIPPED CORE DRILLS

Designed for
concrete, clay and
ductile iron pipe.

FEATURES OF DIAMOND TIPPED CORE DRILLS

Accurate cored openings manufactured to Kor-N-Seal® specifications.

Manufactured to meet specific cutting requirements.

Manufactured inhouse — Milford, New Hampshire, USA

Only new, premium quality diamonds are used.

Fast, efficient drilling.

Close tolerance allowing trouble-free seal installation.

RECROWN SERVICES

Diamond core drill recrown services are available. To be recrowned, the core drill barrel must be in reusable condition. Services include:

Initial inspection

Barrel reconditioning

New segment installation

Repainting

Quality control inspection

QUICK CHANGE ADAPTER:

Quick-Change Adapters are available for our A-Flange core drills. They greatly reduce core drill change time and are designed to fit NPC Hydrokor coring machines.
