

Handling instructions

SELF-ADHESIVE PROFILES (SOLID, SPONGE, CO-EX)

Management of self-adhesive profiles (SA profiles) must conform to industry standards. Particular attention should be paid to:

1. Proper storage

- 1.1. SA profiles must be stored indoors, kept at temperatures 21 ± 5 °C and relative humidity of 50 %, for the period not exceeding 6 months. SA profiles must be stored in their original packaging.

2. Usage

- 2.1. SA profiles must be applied to clean, dry, greaseless and dustless surfaces. Temperature at adhesion must be between 15 °C and 30 °C. When assembling SA Profiles, adhesive tape should only be used as an aid.

3. Cleaning

- 3.1. SA profiles must be cleaned with window cleaning solutions which are generally available on the market, including retail stores.
