

QUALITY POLICY

Trelleborg Applied Technology is committed to the Quality Management System.

Its aim is to ensure that the products and services we provide to our customers consistently meet or exceed their expectations. We have set objectives and targets that measure customer satisfaction and areas of our process so that we can continually monitor our performance and decide on improvement programmes.

Our people are an important part of our strategy and it is our objective to ensure that they have the necessary skills, information and working environment to carry out their roles effectively and safely. We believe that it is important to keep our staff informed and we communicate our objectives and targets to them so that they are kept aware of our performance.

We aim to produce our goods in the most efficient and effective way so that we remain competitive and we review our strategy on a regular basis to see what changes we can make to improve our effectiveness.

We believe we have a duty to make sure that our activities have the least impact as possible on the environment and we are certified to ISO 14001.

It is the responsibility of all of us to carry out our tasks to make sure we maintain our objectives and meet our goals.

Jan Wilson
Director and General Manager
