

Trelleborg Rubore

Leading Expertise in Engineered Silence

We provide our customers a unique material, NVH expertise and an engineered solution for structure-borne noise problems.

Pinpoint the noise, tailor the solution

Constrained Layer Damping (CLD) material has superior performance compared to existing materials.

What makes CLD special is its outstanding qualities combined with Trelleborg Rubore's NVH know-how on pinpointing noise problem areas.

- Superior tuned damping
- Thin design
- Light weight
- Easy assembly

CLD provides excellent damping of structure-borne noise and can be applied to any structure.

"Our objective is to continue being the leader in engineered silence in today's and tomorrow's automotive challenges"
