

Trelleborg Rubore

Leading Expertise in Engineered Silence

We provide our customers an engineered solution with our NVH expertise and unique shim material for outstanding silent performance in brakes.

Pinpoint the noise Tailor the solution

In brake applications where high damping properties are required over a wider temperature range.

WIDENOX - a new innovative shim material with outstanding damping properties over a wider temperature range, Trelleborg Rubore now introduces a superior ground-breaking shim material.

- ONE shim material for all possible NVH solutions?
- Superior durability & corrosion resistance
- Excellent resistance to piston penetration and wear
- A robust solution with excellent NVH performance

Our objective is to continue being the leader in engineered silence in today's and tomorrow's automotive challenges
