

INTERNAL CONTROL OVER FINANCIAL REPORTING

Internal control over financial reporting is included as a part of the overall internal control at Trelleborg, and constitutes a central component of Trelleborg’s corporate governance. The key goals are that internal control is appropriate and effective, provides reliable reports and complies with laws and regulations.

The starting point for the internal control process is the regulatory framework for internal control issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). According to COSO, the review and assessment are conducted in five areas where the control environment creates discipline and provides structure for the other four areas; risk assessment, control structures, information and communication, and monitoring.

Control environment. The control environment provides the basis for the internal control. One important aspect is that decision making, authority and responsibility are clearly defined and communicated between different levels within Trelleborg and that policy instruments, in the form of policies, manuals and recommendations, exist (refer to page 72 for a list of external

and internal policy instruments) and are observed.

The Board of Directors bears overall responsibility for financial reporting where the Audit Committee assists the Board by monitoring, for example, the efficiency of Trelleborg’s internal control, internal audit and risk management.

The responsibility for maintaining an effective control environment and the day-to-day work involving internal control is delegated to the President.

The Group’s Internal Control staff function serves as the Group’s internal audit function and reports to the Audit Committee and the Group’s CFO. The function focuses on developing, enhancing and securing internal control over the Group’s financial reporting by proactively concentrating on the internal control environment and by examining the effectiveness of internal control.

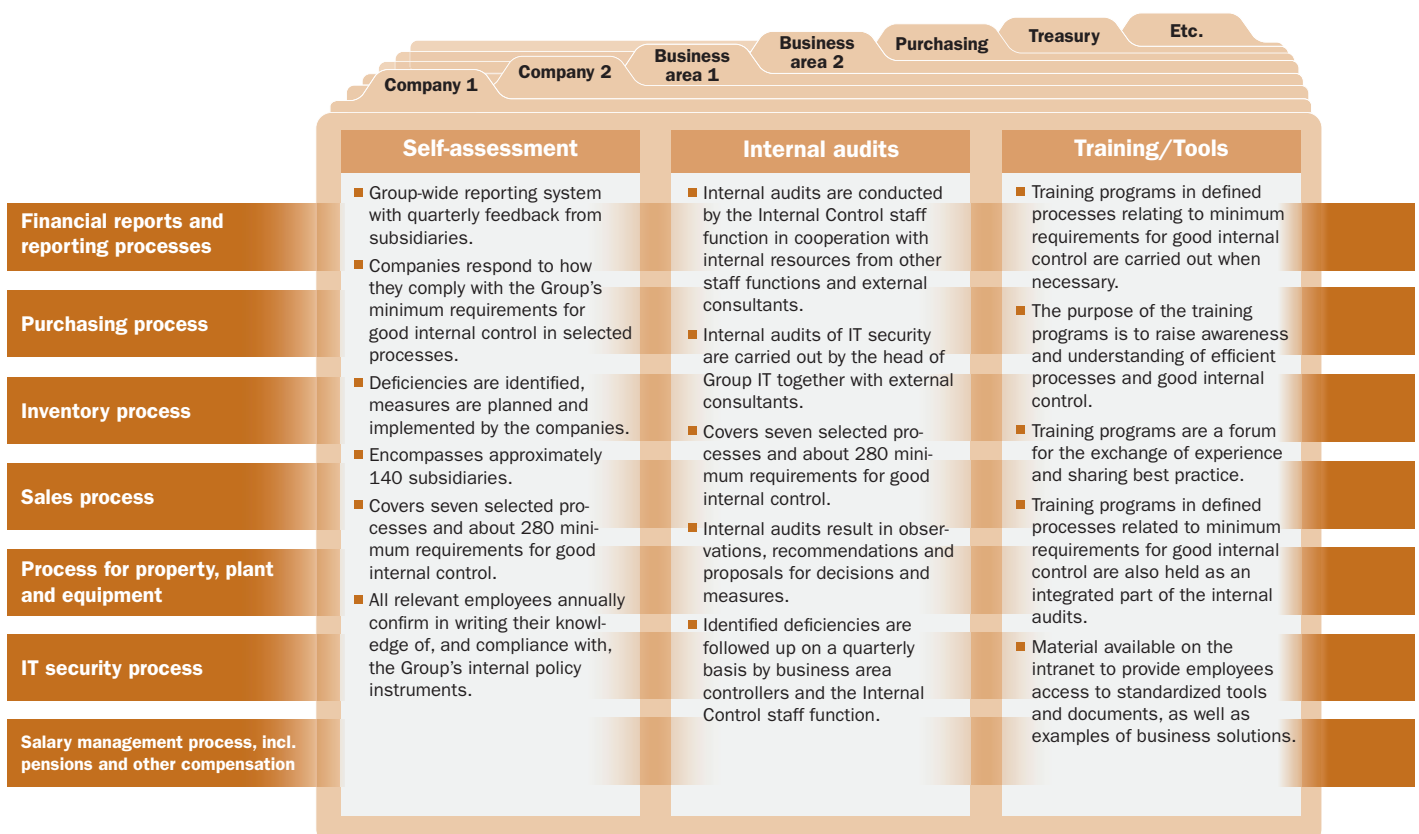

Risk assessment. Risk assessment aims to identify and evaluate the most significant risks, including risk of fraud and risks in connection with significant changes, that affect internal control within the Group.

The assessment results in control targets that ensure that the fundamental demands placed on external financial reporting are fulfilled and comprise the basis for how risks are to be managed through various control structures.

The risk assessment is updated on an annual basis under the direction of the Internal Control staff function and the results are reported to the Audit Committee.

Control activities. The most significant risks are managed through control structures in the Group. Management may entail that these risks are accepted, reduced or eliminated.

INTERNAL CONTROL STRUCTURE OF THE TRELLEBORG GROUP

The control structures aim to ensure efficiency in the Group's processes and good internal control and are based on minimum requirements for good internal control in defined processes. Refer to the illustration on page 78.

Information and communication. The internal policy instruments are available to all relevant employees on Trelleborg's intranet and are generally provided through training. Special campaigns are conducted covering, for example, the Group's whistleblower system. All relevant employees annually confirm in writing their knowledge of, and compliance with, the Group's internal policy instruments.

The Group's CFO and the Head of the Internal Control staff function report the results of their work on internal control as a standing item on the agenda of the Audit Committee's meetings. The results of the Audit Committee's work in the form of observations, recommendations and proposed decisions and measures are continuously reported to the Board. The minutes of Audit Committee meetings are presented to the Board and the Chairman of the Audit Committee reports on its work.

External financial reporting is performed in accordance with relevant external and internal policy instruments.

Monitoring. Monitoring to ensure the effectiveness of internal control is conducted by the Board, the Audit Committee, the President, Group Management, the Internal Control staff function, Group Finance, Group Treasury and Group Tax as well as the Group's companies and business areas.

Monitoring includes the follow-up of monthly financial reports in relation to targets, quarterly reports with results from

self-assessments in the Group's companies and business areas, and results from internal audits. Monitoring also encompasses following up observations reported by Trelleborg's auditor.

The Internal Control staff function works in accordance with an annual plan that is approved by the Audit Committee. The plan is based on the risk analysis and encompasses prioritized companies, business areas and processes within the Group, as well as work programs and budgets.

Activities in 2017. During 2017, the Internal Control staff function conducted 54 internal audits in 22 countries, of which 20 were IT security audits. The emphasis was on Europe and the U.S. Most of the internal audits were conducted by the Internal Control staff function in cooperation with internal resources from other staff functions with specialist competence in such areas as purchasing, finance and legal affairs, or jointly with controllers from various business areas. Internal audits of IT security were carried out by external IT consultants together with the IT Group staff function. In 2017, the Internal Control staff function worked on a broad front with reviews of all processes.

Activities in focus in 2018. The number of internal audits will generally remain at the same level as 2016 and 2017. Geographically speaking, the Internal Control staff function will primarily devote a greater focus to Europe, the U.S and South America. In 2018, the Internal Control staff function will continue to work broadly on reviews of all processes. A small number of combined financial and legal internal audits are planned in cooperation with the Group Legal.
