

Odin Jacket

Odin GS (Grout Seal)

Once a HVDC jacket is constructed, it will be transported to the offshore installation site where it will be upended and descended onto the seabed. In order to ensure that the jacket is securely fixed to the seabed, piles are driven through the jacket legs or the skirt sleeves.

The annulus between the pile and the jacket leg or skirt sleeves will be sealed by grout seal. It seals the annular gap to ensure that no leakage can occur during grouting. The grout will provide a reliable bond to keep the jacket secured and stable. The grout seal helps to keep the grouting process free from contaminants and thereby reinforces the integrity of the substructure.

Trelleborg's Odin jacket leg can system is designed to encompass the sealing needs during the installation of an oil and gas /HVDC jacket substructure.

Our Odin GS (Grout Seal) provides a reliable and robust sealing between the inner diameter of the jacket/skirt and the outer diameter of the pile. Our Odin GS can also be used as standalone. Our Odin GS can tolerate reverse movement and offset position in the pile. We can design and supply a total sub-structure leg can system solutions to your specification.

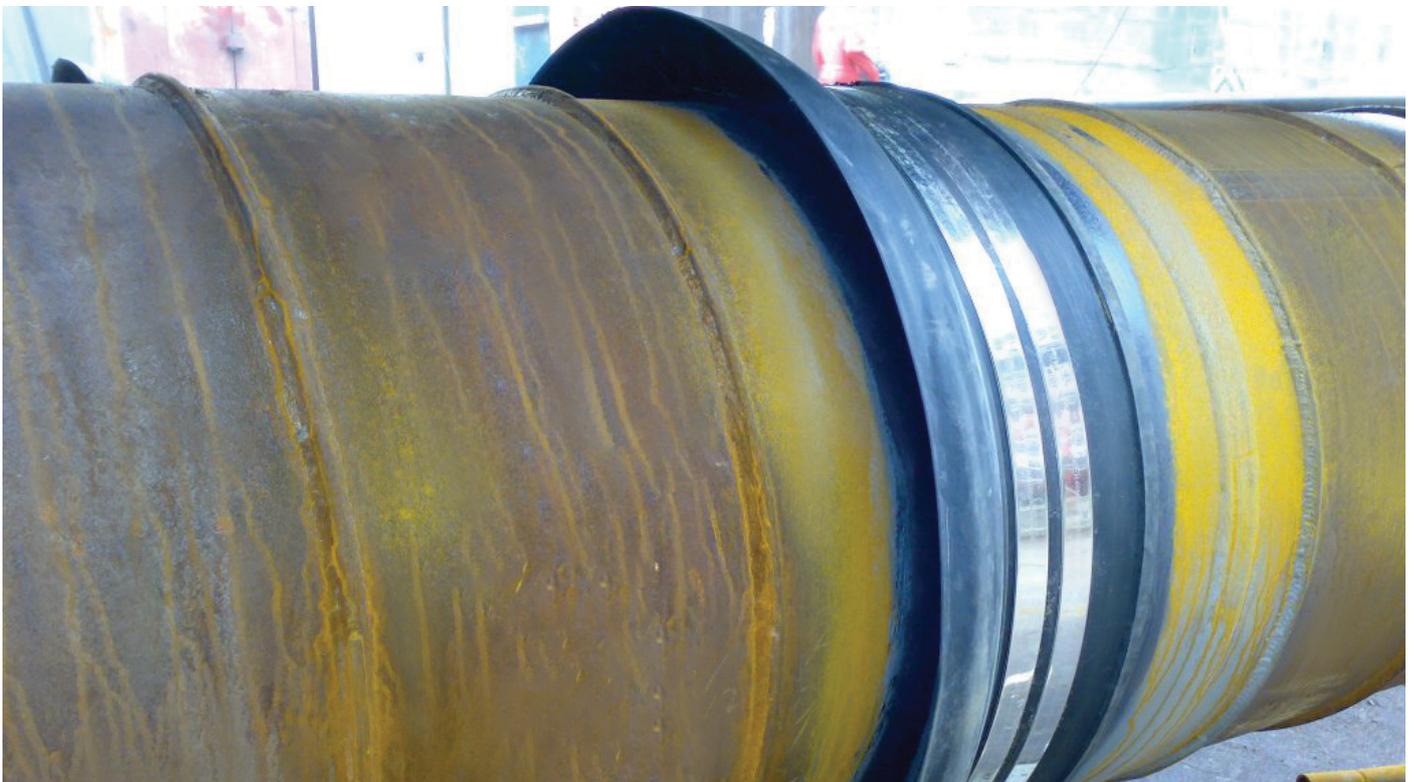

Applications:

- Offshore Jacket Substructure
- Skirt Sleeves
- LNG Terminal Construction
- Mining Terminal Construction

Benefits:

- Easy installation
- Provides reliable sealing between Jacket ID and Pile OD
- Hydrostatic tested to 1.5 times of the operating pressure
- Can be utilized on their own in certain environments
- Prevent mud contamination during grouting process
- Tolerate reverse movement of the pile
- Tolerate to maximum offset position of the pile

Contact Us

Trelleborg Applied Technologies division is an industry expert in delivering innovative and reliable solutions that maximize performance for our customers. Our vast range of specialized, customizable materials ensure peace of mind at every stage of your project. With reliable and efficient project management and manufacturing we endeavour to take performance to new levels by achieving your goals safely, on time and within scope.
