

# Tailored buoyancy solutions

## Njord DBM (Distributed Buoyancy Module)

In floating production scenarios, pipelines such as flexible risers, cables and umbilicals are often required to be held subsea in specific geometric configurations designed to prevent over utilization of the system. Although numerous configurations have been developed and implemented over the years, one favored method is to attach discreet buoyancy modules to the outside of the pipeline. The buoyant load must not migrate or degrade over the design life of the product.

Njord DBMs (Distributed Buoyancy Modules) are typically used between a subsea structure and a surface vessel or platform. The clamping solution allows the Njord DBMs to be fitted at any point along the length of the pipeline.

The two main functions of the Njord DBMs are to provide uplift and maintain location along the riser. The uplift is generated by a two part buoyancy component. A clamp securely attaches the assembly to the desired location on the riser. The buoyancy segments are assembled to mechanically lock around the clamp and are secured with circumferential straps.

To provide the project performance at every level, the buoyancy system can be adjusted to operate in seawater depths from surface to 6,000m and beyond.

## Benefits:

- Reduces top tension loads
- Maintain project specific riser configuration
- Fast, efficient and safe offshore installation procedure
- Compliant systems aimed at encapsulating large flowline tolerances and expansions/contractions
- Extensive subsea track record
- Industry qualified materials and geometry
- Comprehensive document and drawing package

## Contact Us

Trelleborg Applied Technologies division is an industry expert in delivering innovative and reliable solutions that maximize performance for our customers. Our vast range of specialized, customizable materials ensure peace of mind at every stage of your project. With reliable and efficient project management and manufacturing we endeavour to take performance to new levels by achieving your goals safely, on time and within scope.
