

Product applications Land

Water resistant, polyurethane coated fabric, slide fastener of zippers for various defense soft goods applications

Polyurethane coated fabric for self inflating camping mattresses

Dri-Light™ hydrophobic insulation fabric for cold weather apparel

Polyurethane coated fabric for the toe and saddle of a defense recruit athletic shoe

Polyurethane coated fabric for stuff sack liner

Polyurethane coated fabric for defense ruck sacks and airtight, submersible, high performance dry bags

3 layer polyurethane coated and laminated system for defense equipment cover and bag

CONFOR® foam - innovative urethane foam provides maximum comfort and exceptional impact resistance and shock control

Polyurethane coated fabric for defense stuff sack - 3 season and 4 season

Accelerating performance in a wide range of defense applications

As a world leader in engineered polymer solutions, Trelleborg is able to seal, damp and protect critical applications in demanding environments. Our innovative solutions are designed to accelerate our customers' performance in many different ways – from improving functionality to increasing productivity. Trelleborg is able to provide tailored solutions using proven materials and technologies to meet the defense needs and requirements.
