

Coating Innovations

Epichlorohydrin (ECO)

Your Partner for Engineered Coated Fabrics

Trelleborg's engineered coated fabrics operation works with an outstandingly comprehensive variety of polymers, including ECO.

General Properties: Excellent oil and ozone resistance. Good flame resistance and low permeability to gases. Fair low temperature properties.

Resistant to: Many hydrocarbons, fats, oils, greases, hydraulic fluids, chemicals, acids and alkali. Ozone resistant.

Attacked by: Ketones, esters, aldehydes, chlorinated and nitro hydrocarbons.

General Polymer Characteristics:

Abrasion Resistance	Good
Compression Set	Good
Elongation	Good
Flame Resistance	Fair
Gas Permeability	Excellent
Low Temp. Flexibility	Good
Tear Resistance	Good

Recommended Shelf Life

The recommended shelf life may vary based on polymer type and compound formulation. The actual life could vary dramatically based on storage conditions.

Contact Us

Throughout the world, within the most technologically advanced industries, Trelleborg adds layers of innovation to ensure the highest performance in engineered coated fabrics.

Our polymer-engineered solutions are built on technical and industry know-how, delivered by experienced teams across a proven and efficient process methodology.

Our experts will help you find the optimum coating for your application requirements, using a proven formulation or a unique customized coating developed by our in-house development team.
