

Trimsyn™ & Trimlok™

# High quality support syntactic floats

Trimsyn™ syntactic floats are manufactured using high performance syntactic foam and are floats which offer additional buoyancy in all marine applications, such as umbilical cable support, ROV trim buoyancy or as simple installation aids.

To streamline the attachment of Trimsyn™ floats, we developed the Trimlok™ umbilical clamp. Molded in a marine grade polyurethane elastomer, the clamp is sized to fit around a cable or umbilical, providing positive grip without damaging the structure of the umbilical.

## Features & Benefits

Trimsyn™ syntactic floats and Trimlok™ attachments offer excellent features and benefits and are safe, efficient and easy to use. As the product is off the shelf stock orders and delivery are quick and easy.

## Positive Connection

A large eyebolt swivel assembly allows the Trimlok™ to remain attached to the float by means of a karabiner and pendant wire.

## Easy Installation

Trimlok™ eyebolt is suitably sized for operation by cold or gloved hands.

TRIMSYN™ SPECIFICATIONS

Type-Depth	Weight in air (kg)	Nett buoyancy (kg)	Nominal diameter (mm)
MTS-1000	10	8	300
MTS-2000	11	7	300
MTS-3000	12	6	300
TS1-1000	16	13	350
TS1-2000	17	12	350
