Where any flexible tubular connects to a structure, normal movement during operation (dynamic loading) or forces incurred during installation and retrieval (static loading) can cause catastrophic failure of the tubular at the termination point. The failure mode can be through collapse, rupture of internal lines or even rupture of the external layers leading to escape of the contents to the environment. This can happen as a result of a single event or be caused through fatigue damage over time.

Bend limiting devices are provided to protect the tubular from these situations and perform the following functions:

- Maintain the manufacturers recommended minimum bend radius (MBR) during the life of the project
- Provide a suitable load path from tubular to fixed structure
- Reduce point loading at the termination to an acceptable level

**Njord BS (Bend Stiffener)**

Njord BS acquired their name because the conical shape gradually increases the overall stiffness of the tubular in order to prevent over bending at the termination point. Manufactured from elastomeric material, a Njord BS is suited to the constant wave and current induced motion of dynamic installations but can also be used for static applications.

Njord BS are project specific and to provide you with the performance at every level, Trelleborg Offshore will fully engineer the product to accommodate the defined tension and angle combinations.

Trelleborg Offshore’s track record in the supply of Njord BS, specifically for dynamic applications, is extensive.
Benefits:

• Added local stiffness to the umbilical or flowline
• Limits bending stresses and curvature
• Prevents structure damage from overbending
  Reduces structure fatigue

Achievements:

• First dynamic bend stiffener supplied for service in 1994
• Over 1,000 dynamic bend stiffeners currently in service
• Njord BS operates in locations around the world in ambient temperatures ranging from -20°C/-4°F to 50°C/122°F
• 100% track record with no failures in service
• Lloyd’s Register Type Approval

Contact Us

Trelleborg Offshore delivers innovative and reliable offshore solutions that maximize business performance to meet your needs. Our dedicated and highly skilled staff are always on hand to provide seamless process support from initial idea, through to delivery and beyond.
