

Innovation & Solutions

Trelleborg's Rollers & Belts operation, leading manufacturer and supplier of **rollers and sleeves coverings** for the tissue converters and belts for the textile industry, offers a wide range of solutions for:

- Rubber and polyurethane rollers for the converting industry (tissue, foils, textile finishing, non-woven...)
- Composite sleeves manufacturing
- Rubber shrinking belts for textile finishing
- Roll covering tapes

Beyond the product we offer also:

- A committed Research and Development activity
- A dedicated manufacturing unit in France
- A NIP Simulator system to tailor-make/customize our rollers coverings and match application requirements
- An integrated logistic service

Press Plast 4

Polyurethane Marring Rolls Solution

The latest developments of market require a continuous improvement of performance and durability of the application.

For this reason, Trelleborg introduces Press Plast 4, the new polyurethane covering specifically designed for Marring Rolls position.

This new line of Polyurethane rolls thanks to its antistatic characteristics it prevents the deposit of residues on the roller and allows easy cleaning operations.

Marring Rolls for Tissue converting lines

Key Features

- Concentricity tolerance < 20 µm
- Cylindricity < 50 µm
- Low surface roughness (0,7÷1 Ra)
- High abrasion resistance
- Dimensional stability
- Antistatic properties
- Longer product life

Benefits

- Extended lifetime
- Perfect Bonding
- Extended mechanical stress resistance
- Easy cleaning operations
- High cut resistance

The product at a glance

HARDNESS	90 to 98 Sh A
MAXIMUM WORKING SPEED	700/800 m/min.
COLOUR	Blue
