

Trelleborg's Printing Solutions Facilitates Magazines Publishers and Corporate Groups

As Turkuvaz Publishing Group, we have been supplying printing services to the biggest magazine publishers and corporate companies in Turkey thanks to our more than 200 personnel. We have:

- 3 x M600 commercial web presses
- 1 x Solna commercial web press
- 1 x 8 colors of sheetfed press
- 1 x 2 colors of sheetfed press
- Various post printing machines

Our company policy is to be in continuous development and research to be able to meet the demands of the publishing groups by the fastest way and always with the same quality.

That is why we always need to control all the parameters which can affect our printing quality to keep our standards high and to work with the maximum efficiency.

Our target is to prevent technical and mechanical problems before they occur, in order to avoid waste time by interrupting the printing process.

We have found out that Trelleborg's "Vulcan® Alto ND2" was the unique blanket which could meet our expectations and help us to keep our high printing standards after testing lots of printing blankets at our facilities.

"Now we are sure that we have the best dot transfer even at the hardest printing conditions" says Managers at Turkuvaz Publishing Group.
