

# Rollin

The rubber belt for any compressive shrinking

## The rubber belt for any compressive shrinking.

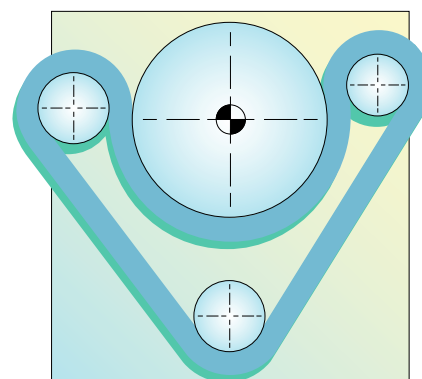

Trelleborg offers a range of rubber shrinking belts for use on Sanfor, Comfit and Muzzi machines. Rollin assures an optimum shrinkage for the most demanding fabrics. Due to its new inner face, Rollin always guarantees better reliability and longer life time for your rubber belt.

### Key features

- Seamless multilayer structure
- Consistency of performances
- Improved mechanical resistance of the inner face
- Available for Comfit and Muzzi machines
- Any fabrics: knitted or woven, cotton or men-made fibers

### Benefits

- High shrinking rate
- Outstanding surface aspect of the fabrics
- Longer life time between grindings

## Technical Specifications

### Characteristics

<b>Internal development (mm):</b>	<b>3962 - 13 feet (a)</b>
<b>Thickness (mm):</b>	<b>67* (a) (b)</b>
<b>Width (mm):</b>	<b>1400 to 3600</b>
<b>Structure:</b>	<b>Multilayer</b>
<b>Hardness of outer face (ShA):</b>	<b>38</b>

(a) Also available for Comfit and Muzzi machines.

(b) For other thicknesses, please contact us.

## Technical Service and online tools

- **Our technical support team is available to support your maintenance staff on:**
  - Installation and start-up
  - Overhauls
  - Technical field support
  - Failure analysis
  - Efficiency enhancing advisory program
- **A repair kit proposed in case of incident on machine**
- **A reactive sales and technical organization to manufacture rubber belts within very short time in case of emergency**
- **User and maintenance manual: download from [trelleborg.com/en/printing/Resources/Downloads](http://trelleborg.com/en/printing/Resources/Downloads)**
