

Innovation & Solutions

Trelleborg Coated Systems Rollers and Belts operation, leading manufacturer and supplier of **rollers and sleeves coverings** for the tissue converters and belts for the textile industry, offers solutions for:

- Rubber rollers coverings for the converting industry (tissue, foils, textile finishing, non-woven...)
- Composite sleeves manufacturing
- Rubber shrinking belts for textile finishing
- Roll covering tapes

Beyond the product we offer also:

- A committed Research and Development activity
- A dedicated manufacturing unit in France
- A NIP Simulator system to tailor-make/customize our rollers coverings and match application requirements
- An integrated logistic service

XL Plast

Embossing Solution

Since embossing patterns can be very aggressive and demanding, your converting lines deserve the most resistant rubber coverings. XL Plast is a state of the art rubber-covering specially designed for harsh embossing applications such as double height pattern and high height pattern.

Delivering faithful pattern reproduction and boosting line efficiency, the XL Plast rubber covering guarantees an exceptional lifetime thanks to an outstanding abrasion resistance

Embossing for Tissue converting, particularly high pattern for kitchen and household towels

Key Features

- Consistent hardness
- Abrasion resistance
- Mechanical stress resistance
- Outstanding resilience (fast elastic recovery to the original shape)

Benefits

- Extended lifetime
- Perfect thickness of the substrate
- Faithful pattern reproduction
- Homogeneous production quality
- Increased volume of the final product
- Reduced maintenance

The product at a glance

HARDNESS	50 Sh A
MAXIMUM LINEAR LOAD	up to 60 kg/lcm
MAXIMUM WORKING SPEED	700 m/min
COLOUR	Fuchsia
