

Kranj, January 2022

**REACH STATEMENT**  
(According to Article 33 of REACH Regulation)

Dear Customer,

The company **Trelleborg Slovenija d.o.o. – EKO** ensures the compliance of its products and semi-products with the requirements of the REACH regulation by purchasing and using only those raw materials which are in compliance with the regulation. We use only substances and mixtures which are registered by our suppliers or manufacturers. As a downstream user we regularly communicate with our suppliers with regard to REACH.

According to Article 33 of the REACH regulation, each product supplier is obligated to provide its customers with information on the safe use of a product if that product contains substances of very high concern (SVHC) in a concentration above 0.1%.

The list of the substances of very high concern (SVHC) is available on the website of the European Chemicals Agency (ECHA) at <http://www.echa.europa.eu/sl/candidate-list-table>.

We confirm that our products (**Environmental Protection and Rescue**) do not contain SVHC substances, included in the current Candidate List (last update 17.1.2022) / Annex XIV of the REACH Regulation, in concentrations above 0.1 %.

If the next updates of the Candidate List modify the classification of some of these substances, we will inform you about it immediately.

Consultant for Chemicals  
Bernarda Potočnik
