

Trelleborg External Joint Wrap

Designed to create a high performance seal in precast structures and pipe joints

Trelleborg External Joint Wrap is a custom compounded butyl-based sealant specifically designed to create a high performance seal in precast structures and pipe joints.

FEATURES

Excellent adhesive and cohesive strength

Self-priming and self-healing

Highly resistive to temperature extremes and acid or caustic environments

Remains permanently flexible

Easily applied, high-performance seal

Trelleborg External Joint Wrap is highly effective when used in installations where hydrostatic or vacuum testing is required.
