

# ServicePLUS

THE PLUS FOR YOUR BUSINESS

**+ ENGINEERING**

**OPTIMIZE PRODUCT & APPLICATION PERFORMANCE**

ServicePLUS supports a full range of engineering activities

**+ ENHANCED SUPPLY CHAIN**

**STRENGTHEN CORE BUSINESS PROCESSES**

ServicePLUS ensures products are available when and how you need them

**+ AFTERMARKET**

**BOOST CUSTOMER CARE**

ServicePLUS for the aftermarket ensures your customers get the support they need

**+ MANUFACTURING**

**MAXIMIZE PRODUCTION THROUGHPUT**

ServicePLUS streamlines your manufacturing processes

# Make a PLUS with your business

**When you partner with Trelleborg Sealing Solutions through our ServicePLUS program, you can focus on your core business while we focus on ensuring all of your value chain needs are covered.** We concentrate on business activities, which typically offer the largest resource saving opportunities.

The needs of every customer are different and we recognize that. Our ServicePLUS team works with you to understand different aspects of your business model and then creates a service package to meet your unique needs. Our goal is to simplify your business and generate savings for you, our valued customer.

## Set up a Meeting

If you are interested in finding out more about how ServicePLUS can optimize every step of your company's value chain, reach out to your local Sales Engineer. We can set up a meeting between you and our ServicePLUS team to get a first-hand impression and discuss initial ideas.

After visiting you, we will compile a comprehensive report detailing our findings as well as suggested next steps.

+ ENGINEERING

# Optimize product & application performance

**We want to help you maintain your competitive advantage.** Trelleborg engineers and application experts collaborate with you to improve the overall performance and longevity of your products. Additionally, we partner with customers to develop game-changing products and materials before the market even requires them.

**ServicePLUS benefits:**

- + Develop out-of-the-box, custom solutions for your application
- + Combine high performance materials with outstanding product and application design
- + Utilize state-of-the-art testing and development technology, including simulations, additive manufacturing tools and digital tools such as optimization based on digital twins

**Want to find out more about how ServicePLUS can support your engineering activities?**

Just reach out to your local Trelleborg Sealing Solutions Sales Engineer to discuss ServicePLUS and how our services can optimize the performance of your products and equipment.

**+ ENHANCED SUPPLY CHAIN**

# Strengthen core business processes

**Let us help you manage your inventory while improving your total cost of ownership.** Trelleborg ServicePLUS delivery services are uniquely designed to streamline our customers’ procurement, inventory and replenishment processes. We partner with you to develop a customized program, which frees up capital and labor so you can focus on your “Class A” parts and suppliers.

**ServicePLUS benefits:**

- + Simplify stock management with digital tools, e.g. automatically generate orders to replenish stock, have items delivered directly to your production line or warehouse
- + Customize delivery to meet your changing market demands and production cycles with adaptable and scalable programs
- + Optimize procurement with services like c-part management and vendor consolidation services

**Are you interested in learning how ServicePLUS can enhance your supply chain?**

Get in touch with your local Trelleborg Sealing Solutions Sales Engineer to discuss how our ServicePLUS services can support your supply chain processes and generate time and cost savings.

+ MANUFACTURING

# Maximize production throughput

**Our experts can help you increase your production throughput without increasing manufacturing costs.**

Trelleborg ServicePLUS assembly services simplify our customers' production processes by providing customized solutions for a range of manufacturing needs.

**ServicePLUS benefits:**

- + Reduce logistics and handling activities with services like ready-to-use, assembled components
- + Ensure your equipment and the sealing solution inside it match the quality promises you make to your customers
- + Optimize your automated production process with special services including surface treatments and optimized packaged and labeled products

---

**Do you want to know more about how ServicePLUS can streamline your manufacturing process?**

Contact your local Trelleborg Sealing Solutions Sales Engineer to discover ServicePLUS services, which ensure you get the product you need, when and how you need it, to meet your unique production requirements.

---

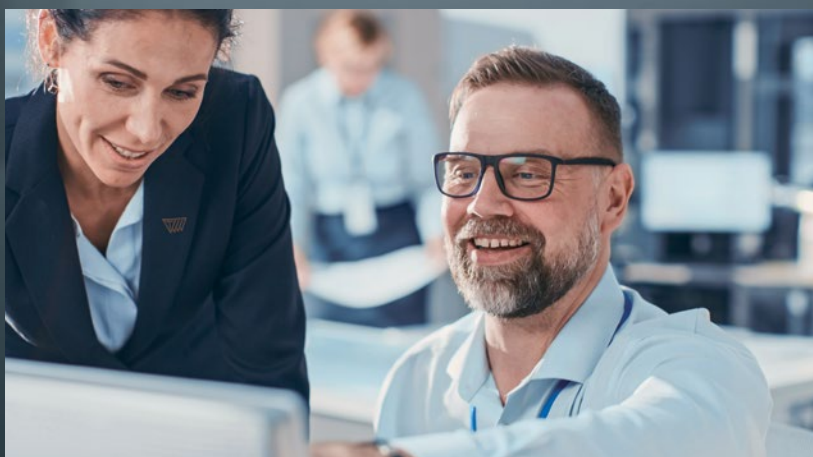

**+ AFTERMARKET**

# Boost customer care

**We can manage the sealing portion of your aftermarket activities so you have more time to invest in your core business.** When we supply a sealing solution, we think beyond the product to the end of the supply chain. Our ServicePLUS solutions support your aftermarket requirements, helping you get your customer up and running again when a repair is needed.

**ServicePLUS benefits:**

- + Ensure seal performance and quality requirements, with special services including Trelleborg installation tools
- + Expedite seals and kits to your customers with our express QuickSeal service and packaging solutions
- + Optimize your MRO services with a full range of special handling and packaging capabilities, including private brand packaging

---

**Interested in finding out more about how ServicePLUS can support your aftermarket business?**

Reach out to your local Trelleborg Sealing Solutions Sales Engineer to discuss our range of ServicePLUS services, which support your efforts to protect and service your aftermarket business.

---

Trelleborg is a world leader in engineered polymer solutions that seal, damp and protect critical applications in demanding environments. Its innovative solutions accelerate performance for customers in a sustainable way.

Trelleborg Sealing Solutions is a leading developer, manufacturer and supplier of precision seals, bearings and custom-molded polymer components. It focuses on meeting the most demanding needs of aerospace, automotive and general industrial customers with innovative solutions.
