Specialised solutions for agricultural operations

Trelleborg's mission is to provide highly specialised solutions to accelerate the performances of your farming operations.

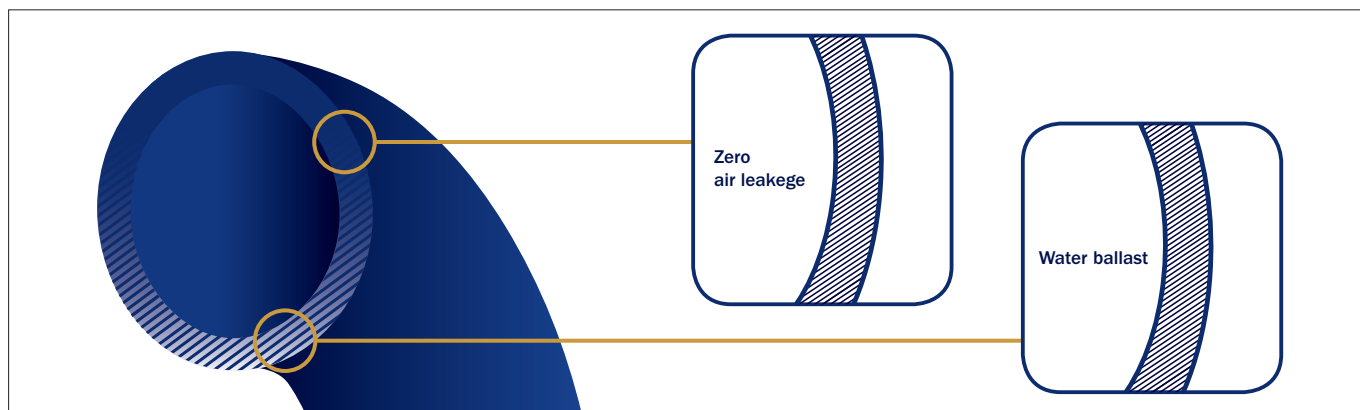

To fulfill this mission, in addition to tyres and wheels, Trelleborg offers a wide range of inner tubes, a key product in agricultural operations. Produced to a high specification for both air tightness and tear resistance, Trelleborg tubes are the best choice for your tyres.

Superior quality

Trelleborg STT tubes are characterised by excellent impermeability for zero air leakage. Whenever water ballasting is required, Trelleborg tubes ensure complete water tightness, securing pressure at low air volume whilst still able to

cope with high loads.

The superior quality of STT tubes, protects the rim from corrosion and tyre chemical attack if water ballasting contains antifreeze or other additives.

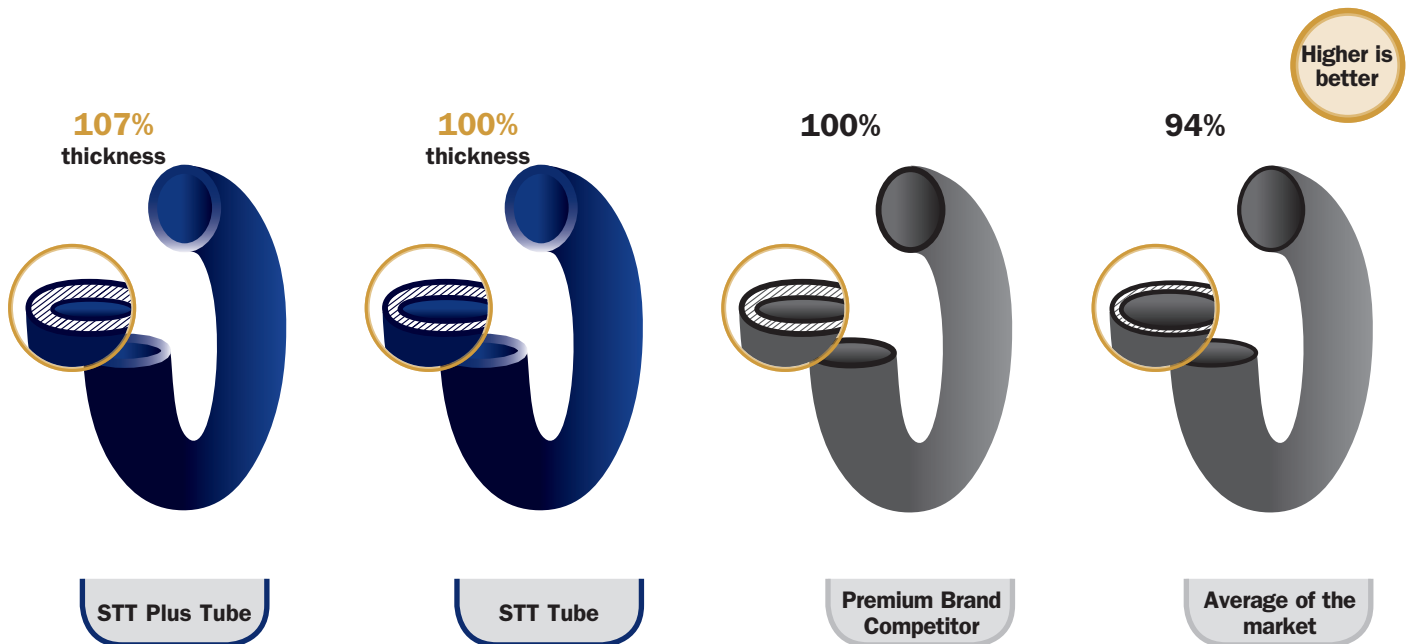

Unparalleled thickness

The extra thickness of Trelleborg tubes ensures high perforation resistance, avoiding downtime costs.

In addition to the standard product, Trelleborg offers a superior range of **100% butyl** tubes for the most demanding customers: STT PLUS. Recent intensive tests show the extreme difference in thickness between STT PLUS tubes

and those of a premium brand competitor. Trelleborg provides a complete range of solutions, maximising the productivity of your business.
