

Release Immediate: December 2015

Trelleborg Showcase Its Extensive Portfolio of Complete Wheel Solutions at Agribex 2015

Trelleborg will showcase its extensive portfolio of high-quality tires and complete wheel systems at Agribex 2015, to be held in Brussels, Belgium, from 8 to 13 December.

Lorenzo Ciferri, Marketing Director, Agricultural and Forestry Tires at Trelleborg Wheel Systems, says: "Providing the ideal platform to bring our latest high performance solutions to those that can benefit from them most, on stand at Agribex 2015 (**Hall 7 Stand 7302**) we'll showcase the size in VF 710/60R42 our new TM1060 range of tires, designed using ProgressiveTraction™ for the latest generation of tractors, ranging from 80 to over 300 HP."

The new Trelleborg TM1060 not only replicates but surpasses the performance of /60 Series tires. The largest size in the new range, the VF 710/60R42, provides a carrying capacity up to 40 percent higher than premium alternatives in the market. In addition, unlike many existing solutions on the market, the TM1060 is suitable for use on tractors over 300 HP and can be used with narrower rims, enhancing tractor efficiency.

In addition, the stand will include a corner dedicated to Trelleborg's TM700 ProgressiveTraction™ tire, specifically designed to improve farming efficiency thanks to a double lug. Operating on the soil at different times, the double lug progressively releases higher traction when required.

The giant IF900/65R46 TM1000 High Power tire, which boasts a maximized tread design and the widest footprint on the market, providing optimum pressure distribution and the utmost respect for the soil, will also be showcased on stand.

Trelleborg's IF 800/70R32 CFO TM3000 tire, the generation of radial tire designed specifically for harvesting applications will also be on stand alongside Trelleborg's TH400 Agro Industrial radial range for telescopic handlers, backhoes and mini loaders.

Finally, the third episode in Trelleborg's series of 3D animated movies, "Space Hops", created using the latest, sophisticated, 3D animation techniques, will also be showed at Agribex Show for the first time.
