

**Release Immediate: February 2016**

## **Trelleborg Presents Its Broad Range of Complete Wheel Solutions at FIMA 2016**

Trelleborg will present its broad range of agricultural tires and complete wheel solutions at the 39th International Fair of Agricultural Machinery FIMA 2016, which will be held in Zaragoza, Spain, from the 16 to the 20 of February, in Hall 7, stand D-7.

Ramon Martinez, Country Manager Spain and Portugal at Trelleborg Wheel Systems, says: "With more than 220,000 visitors and 1,250 exhibitors in 2014, FIMA has become the major event for agricultural professionals in Southern Europe, and provides us with the ideal platform for displaying our latest high performance solutions directly to professionals in the agricultural industry."

Trelleborg's latest innovation, the VF 710/60R42 tire from the new TM1060 range of tires, designed with ProgressiveTraction™ technology for the latest generation of tractors, will be at the center of the 300 meter square stand.

The new Trelleborg TM1060 not only replicates but exceeds the performance of /60 series tires. The largest size within the range, the VF 710/60R42, provides a load capacity of up to 40 per cent more than the premium alternatives on the market. In addition, unlike many existing solutions on the market, the TM1060 is suitable for use on tractors of over 300 horsepower, and can be used with narrower rims, improving the tractor's efficiency.

The Trelleborg stand will also include an area dedicated to the innovative ProgressiveTraction™ tire, designed specifically to improve the efficiency of agriculture, thanks to its double support which, operating on the ground at different points, provides more traction when necessary.

The VF 380/90R46 tire from the new TM150 line for self-propelled sprayers will also be exhibited on the stand; with its VF technology, this is the perfect choice for minimizing furrows and reducing compacting of the ground.

The IF 710/75R42 TM1000 High Power tire, designed with Trelleborg BlueTire™ technology, which ensures greater productivity thanks to its extra-wide tread and low compacting of the ground, will be on the stand, as will the 800/70R32 CFO TM3000 tire, the new range of Trelleborg radial tires for increasing the productive capacity of harvesting machines.

Finally, agricultural professionals will be able to discover Trelleborg's advanced and simple digital tools and Apps, as well as facing the challenges of modern agriculture by playing the new video

game “Farming Simulator 15”, of which Trelleborg is the official sponsor, while familiarizing themselves with Trelleborg tires for different applications.
